

Carter Fuel Systems Introduces 13 New Part Numbers

LOGANSPORT, IN – [Carter Fuel Systems](#), a U.S.-based manufacturer of complete fuel system solutions, has announced the introduction of 13 new part numbers covering a series of model year applications ranging from 2001-14.

Extending coverage to reach 2.7 million additional passenger vehicles, the new part numbers include eight fuel pump module assemblies, three fuel tank sender assemblies, one fuel pump reservoir and one gasoline direct injection (GDI) mechanical fuel pump.

The new part numbers fit popular models such as the Chevrolet Equinox, GMC Terrain, Buick LaCrosse, Mazda CX-5, Chevrolet Silverado, GMC Sierra and Chevrolet Malibu.

Covering a variety of applications including domestic, import, diesel, marine and performance, Carter Fuel Systems has been supplying automotive aftermarket fuel systems for more than 100 years. Carter manufactures a broad line of fuel pumps and accessories, including first and second generation mechanical fuel pumps, electric fuel pumps and pump kits, module assemblies, original equipment (OE) replacement parts and supporting equipment.
