

## AAPEX News

**LAS VEGAS** -- Rebranded for 2016, the NARSA Pavilion will now be known as the Mobile Heat Transfer, Heating, and Air Conditioning Section and will feature two convenient locations on the [AAPEX](#) show floor at the Sands Expo Center this coming November. Buyers representing major program groups, service chains and retailers have indicated that they would prefer Centralized groupings of products in order to maximize their time at the show.

[AAPEX](#) takes the wraps off its newly redesigned Global Marketplace on Level One of the Sands Expo Center. The layout has been improved to ease navigation for buyers. The Global Marketplace will feature the following sections: Mobile Heat Transfer, Heating, and Air Conditioning, Accessories and Custom, Tools & Equipment, Underhood, Undercar, Wheel, Steering & Alignment.

For those companies not participating in the Global Marketplace, NARSA features its Level Two Pavilion of leading member companies in the mobile heat transfer and air conditioning businesses.

Booth space assignment for the NARSA Pavilions is based on a combination of priority points and participation within the Association. NARSA Management will make the best effort to accommodate your request for booth location, however we cannot guarantee all requests will be met.

For additional information on exhibiting in the Mobile Heat Transfer, Heating, and Air Conditioning Section please contact NARSA at [info@narsa.org](mailto:info@narsa.org).
