

Radiator & Heat Exchanger Manufacturing Equipment, Metal Fabricating, Welding & More

[Hilco](#) was appointed by the Company to assist in the sale of machinery and equipment no longer required to the ongoing operations. This Calgary, Alberta, Canada based manufacturer produced premium quality Charge Air Coolers (CAC), Charge Air Cooler Testing Equipment, Oil Coolers, Radiators, and Radiator/ Charge Air Cooler Cooling Modules for all turbo-diesel powered equipment used in Transportation, Agricultural, Industrial, and other Applications.

The realignment of this facility offers manufacturers of heat transfer products, including large industrial radiators and heat exchangers, the opportunity to increase production or upgrade existing equipment by purchasing name brand production lines and machinery at auction prices.
